Specifications

- Humidity Range: 20-80%
- Humidity Differential: 5%
- Operating Temperature: 32-140°F (0-60°C)
- Operating Humidity: Non-Condensing Environment (0-99%)
- Voltage Input: 120 or 115 VAC
- Voltage Output: 120 or 115 VAC
- Max Amperage Rating: 15 AMPS
- Frequency: 60 Hz
- Dimensions: W x H x D: 4in x 6in x 2'Yin (10cm x 20cm x 6cm)
- Power Cord: 6-ft, piggy-back 14 awg, SJTW rated

Five Year Limited Warranty

Green Air Products guarantees this equipment will perform as implied for the purpose it is intended. Warranties the original purchaser against defects in mechanical parts and workmanship for 5 years. At our option we will repair or replace defective equipment. Warranty service is only performed at the factory or authorized service center. Any usage contrary to specific application or alterations of original construction will void warranty obligations. For further warranty information contact your dealer or Green Air Products service dept.

Quick Start Instructions

Total Humidity Controller

THC-2

Humidifying or Dehumidifying Humidistat

1. Plug power cord into 120 volt wall outlet. We recommend using a surge protector of minimum 550 joules.

2. Plug in a humidifying or dehumidifying equipment into either of the power outlets. If the unit is for use in a mobile home, we recommend using a surge protector of minimum 550 joules.

3. Set the mode switch to humidify or dehumify.

4. Set dial to your desired set point. Note: settings over 80% or the left or right outlet. Do not exceed 15% current draw.

5. Set the humidifier control to humidify mode or dehumidifying equipment into either of the power outlets. If the unit is for use in a mobile home, we recommend using a surge protector of minimum 550 joules.

6. Set the mode switch to humidify or dehumify.

7. Set dial to your desired set point. Note: settings over 80% or the left or right outlet. Do not exceed 15% current draw.

Quick Start Instructions

1. Plug power cord into 120 volt wall outlet. We recommend using a surge protector of minimum 550 joules.

2. Plug in a humidifying or dehumidifying equipment into either of the power outlets. If the unit is for use in a mobile home, we recommend using a surge protector of minimum 550 joules.

3. Set the mode switch to humidify or dehumify.

4. Set dial to your desired set point. Note: settings over 80% or the left or right outlet. Do not exceed 15% current draw.

5. Set the humidifier control to humidify mode or dehumidifying equipment into either of the power outlets. If the unit is for use in a mobile home, we recommend using a surge protector of minimum 550 joules.

6. Set the mode switch to humidify or dehumify.

7. Set dial to your desired set point. Note: settings over 80% or the left or right outlet. Do not exceed 15% current draw.

Safety Instructions

- Use a single product unit with a minimum of 550 joules.
- Do not plug into a receptacle rated for more than 1500 watts.
- Do not expose to rain or snow.
- Do not operate near water or close to other electrical outlets.
- Do not allow children or pets to use the unit.
- Do not use as a substitute for a humidifier or dehumidifier.

Description

They both provide the same function:

2 outlets - There is two 120 volt outlets. One on each side of the controller.

2 Mode switch - Choose according to the operation you want. The THC-2.

2 Humidity Dial - Set dial to desired optimum set point. In the humidifying mode, set dial to desired optimum set point. In the dehumidifying mode, set dial to desired optimum set point. The THC-2.

Note: Under 20% and above 80% may not achieve desired results.
